Qualified Retirement Plans

- “Custody” account – accepts contributions of pre-tax income, holds and invests the funds on a tax-deferred basis
- Withdrawals are taxed as ordinary income
- Purpose: provide retirement income – not to encourage savings or build estate value
 - Before 59½: 10% early withdrawal penalty
 - After 72: Minimum required distributions

Retirement Plan – Contribution at Death

Notes:

- Expedited payment to charity
- Distribution must be directly from plan, not provision in Will
- Consider coordinating provision in Will
- Careful planning for married couples

Retirement Plan – Gift During Lifetime

Simply withdraw money from qualified plan, then contribute cash to charity

- Assuming over age 59½, should be a wash:
 - Withdrawal creates taxable income
 - Contribution creates offsetting deduction
- Complexities of standby withholding, timing, AGI limits, tax reporting

Qualified Charitable Distribution (QCD)

“IRA Charitable Rollover”

Transfer up to \$100,000 from IRA to charity with no income tax on withdrawal

- Donor must be age 70½ or older
- Outright contribution (no life income plans)
- Transfer must be from the IRA administrator directly to the charity
- No supporting organizations, private foundations, or donor advised funds

Note: QCD counts toward Required Minimum Distributions without creating taxable income for the donor

Life Insurance Policy

Insurer	Owner	Insured	Beneficiary
Promises to pay an amount of money (the death benefit) upon the death of the insured	Buys and (usually) pays for the policy; has right to change beneficiary and to give away ownership	The one upon whose death the insurer will pay the death benefit	The one to whom the death benefit will be paid

Life Insurance Premiums

Life Insurance Outright Gift

Life Insurance – Other Considerations

- Charity must be named beneficiary in order to receive death benefit
- Income tax deductions if donor transfers ownership to charity
 - Value of policy at time of gift
 - Future premium payments
- Charity is not obligated to make premium payments – need to manage donor's expectations
- Outstanding policy loans, conditions may reduce value of death benefit
- Policies are valuable assets, should be periodically reviewed and evaluated

Bargain Sale

- Donor sells property to charity for something less than the full fair market value of the property
- Charitable deduction for difference between the fair market value and the sale price
- Donor will be liable for capital gains tax on portion of capital gain – cannot contribute the gain only

Bargain Sale Example

FMV = \$50,000, cost basis = \$20,000

- Donor sells to charity for \$10,000
 - Charitable deduction = \$40,000
 - \$50,000 - \$10,000
- Donor pays capital gains tax on \$6,000
- Capital gain = \$30,000
- $(\$30,000 / \$50,000) \times \$10,000 = \$6,000$
