### Qualified Retirement Plans

- "Qualified" for special treatment by IRS
- Employee Retirement Income Security Act of 1974 (ERISA)
- Includes 401(k), 403(b), SEP plans, SIMPLE plans, etc.
- Traditional IRAs are not qualified plans

### Qualified Plan and IRA Rules

- Withdrawals prior to 59½ subject to 10% penalty
- Withdrawals between 59½ and 72 discretionary and taxable
- At age 72, required to take traditional IRA required minimum distribution (RMD)
- Failure to take RMD subject to 50% penalty tax on the shortfall

To Do

Take RMD From IRA

### Required Minimum Distribution

- RMDs calculated using Uniform Lifetime Distribution Table (See page 4)
  - ✓ 3.65% of the balance at age 72
  - ✓ 4.95% of the balance at age 80
  - ✓ 8.20% of the balance at age 90
  - ✓ 14.71% of the balance at age 99
- Donor may not need or want the RMD
- Donor can make a gift of RMD and offset income with deduction

### Negative Impact of RMD

- Larger adjusted gross income (AGI) can lead to:
  - ✓ Increased Social Security taxes
  - ✓ Decreased Medical Expense Deductibility
  - ✓ Decreased contributions for Roth IRA
  - ✓ Increased Medicare Premiums
  - ✓ Charitable deduction limits

### Gifts of Retirement Plan Withdrawals

- Withdrawals from plan subject to ordinary income tax
- Gift to charity generates income tax charitable deduction
- Deductions itemized only if they exceed standard deduction
- Deduction may not offset taxes on withdrawal

### Qualified Charitable Distributions (QCD)

- QCD can only come from traditional IRA and Roth IRA
- Donor does not recognize income
- No income tax charitable deduction
- Counts toward donor's RMD
- Does not increase donor's AGI

---

---

---

---

---

### QCD Rules

- Donor must have reached 70½ birthday
- QCD would have been 100% deductible
- May not exceed \$100,000 per year\*
- Charity must acknowledge receipt and that no goods or services received
- QCD can fulfill a pledge (see IRS Notice 2007-7, Q. 44)

\* Amount excludable from income reduced dollar-for-dollar by deductible IRA contributions made after 70 ½.

### To Whom Do QCDs Appeal?

- Don't itemize
  - ✓ Standard deduction doubled in 2018
  - ✓ Fewer than 10% of Americans itemize
- Want to reduce their AGI
  - ✓ See prior discussion of negatives of high AGI
- Live in one of the 11 states without a charitable deduction
- Like the simplicity of the QCD

### Combination of Life Income Gift with Roth Conversion

- Could work, but FMV of the asset contributed for the life income plan would have to be much more than the converted assets

Example:  
 \$100,000 Roth IRA conversion  
 \$100,000 deduction requires \$300,000 contribution to a CRT if deduction is 33.3%

**In Summary . . .**

- The QCD is beneficial to many donors and easy to market, but . . .
- There are many other attractive ways to make lifetime gifts of retirement funds, and . . .
- Unlike the QCD, they are not limited to IRAs

**Testamentary Gifts of Retirement Plans**

- *Most retirement plans converted to IRAs before death*
- IRAs not subject to probate
- IRAs are income in respect of a decedent (IRD)
  - ✓ IRD = income to which decedent was entitled at death
  - ✓ IRD paid to estate subject to income tax and estate tax
- IRAs left to charity bypass probate and avoid income tax

**Beneficiary Designations**

- IRAs (and most retirement plans) controlled by beneficiary designation form
  - ✓ Donor's estate planning documents do not control
- Donor may make charity beneficiary of some or all an IRA or other retirement plan
- Designations are by percentages, not dollar amount
  - ✓ Don't know balance in account at owner's death
- Spousal consent required for qualified plans (but not IRAs!)

### Testamentary (at death) Gifts of Retirement Plans

- Qualified plans and IRAs grow tax-free
- At plan owner's death, as if donor took balance of account
- Entire account reported on owner's final tax return
- If estate is beneficiary of plan, significant taxes due
- Amounts for charity pass income tax free
  - ✓ Designation must be directly to charity
  - ✓ If paid to estate, then to charity, adverse tax situation

### It Matters!

- \$1M IRA to child:
  - ✓ Taxed at ordinary income tax rate
  - ✓ Assuming 37% income tax rate, \$370,000 tax due
  - ✓ Net to child? \$630,000
- \$1M house to child:
  - ✓ Basis stepped up to date of death value
  - ✓ Child sells for \$1M; taxes due = \$0
  - ✓ Net to child? \$1M!
- \$1M to charity either way

### Elimination of the Stretch IRA (Only IRAs!)

- What was a stretch IRA?
  - ✓ Tax-deferred benefits of inherited IRA to non-spouse beneficiaries
  - ✓ Inherited IRA RMDs were based on beneficiary's life expectancy-not account owner's
- Now, inherited IRA to a non-spouse more than 10 years younger:
  - ✓ Must be emptied within 10 years after death of account owner
  - ✓ More income compressed into fewer years ⇒ more tax
  - ✓ Wealthy plan owners looking for solutions

### IRA Payable to Charitable Remainder Trust

- Alternative to a stretch IRA
- Payments to heirs for life (or up to 20 years)
- No income tax on IRA at death of donor
  - ✓ CRT is a tax-exempt trust

The diagram illustrates the process in three steps: 1. Donor's estate (Consolidating Estate and Testamentary Trust) transfers the IRA to a Trust. 2. The Trust makes payments to the Family. 3. The Trust also makes payments to Charity.

### IRA Payable to Gift Annuity

- Beneficiary designation to establish CGA
  - ✓ Consider if IRA may be too small for CRT
  - ✓ May require negotiation with IRA administrator

- Amounts distributed from IRA times annuity rate in effect at time of death
- CGA payments fully taxable as ordinary income
- Stretches out payments over life of annuitant
- Estate tax deduction for gift portion

- Only "individuals" may establish an IRA
  - ✓ See IRC 408(d)(3)(C)(ii)
- A charity is not an "individual"
